#### **InkAnswers – Technical Support at Your Fingertips**

- A team of ink experts you can email with questions
- We'll test our inks on your substrate to make the best recommendation
- Middle of a job? Call or email and we can walk you through it
- We'll come to you with workflow planning and production problem-solving
- Our website Ink Chooser, Tech Data Sheets and more are there 24/7
- InkAnswers@Nazdar.com
- 800-767-9942 (US) or +1 913-422-1888 (International)

#### **ISO Approved:**

Since 2000, Nazdar's Quality Management System has been independently certified and registered as meeting the requirements of the International Quality Standard, ISO 9001. This was, and is, an unmistakable signal to our customers that Nazdar has achieved a standard of quality recognized and respected throughout the world.

The ISO 9001 Standard covers every aspect of our business, from the way we operate and manufacture to customer service standards and product delivery.

#### **Environmental Health & Safety:**

Our Regulatory Compliance Department provides extensive training to industry associations and printers. We formulate our products with environmental concerns in mind, including energy-efficient UV inks that are V-Pyrol® free and solvent based inks that are heavy metal free with lower VOCs and easy reclamation.

***Pre-test all ink recommendations prior to full production***

## NAZDAR

INK TECHNOLOGIES

## NAZDAR PAD PRINTING INKS

[Nazdar.com](http://Nazdar.com)

#### Nazdar Inks provide:

- Dependable color, consistency, coverage
- Widest range of substrate compatibility
- Range of inks for every substrate
- Standard colors save cost and time
- A reputation for excellence since 1922

## Nazdar Ink Technologies: Serving the Promotional Products Industry.

#### Nazdar makes inks for:

- Plastics
  - Paper, Cardboard
  - Metals, Coated Metal
  - Glass, Acrylic, PET
  - Textiles, Leather
  - Wood, Bamboo
- and many other substrates...

#### Nazdar helps you succeed

- Spend your time selling products instead of troubleshooting
- Color matches when you need them
- Technical service ready to solve any issues—[InkAnswers@Nazdar.com](mailto:InkAnswers@Nazdar.com)
- Special effects inks that give your customer the wow factor!
- Regulatory Compliance training provided to printers

#### Solvent Inks:

**2300 UV/UVLED Series** Ink is tailored for pad printing on various glass and plastic bottles used in the container and bottle market. 2300 Series is a multi-cure inks system, formulated to cure with UV-LED with peak wavelength emission of 395 nanometers or traditional UV mercury vapor curing systems.

**5100 Series** Solvent-based Screen Ink is designed for container printing, exhibiting adhesion to various plastics, glass, and some metals. 5100 Series has excellent resistance to a wide range of solvents and chemicals used in cosmetics, personal care and household cleaning.

**8400 Series** Solvent-based Polyester Ink is a versatile ink, meeting the requirements of various industrial and specialty print applications, including the insert mold decorating (IMD) process.

**9700 Series** All Purpose Ink is a high gloss, solvent-based ink formulated to perform on a wide variety of substrates. 9700 Series is for indoor and outdoor POP advertising and display applications.

**ADE Series** Solvent-based Epoxy Ink formulated with high quality epoxy resins for excellent adhesion to metals, glass and a wide range of hard-to-print substrates. Provides outstanding solvent, chemical and abrasion resistance. Ideal for container applications.

**PA Series** Solvent-based Poly-All Ink is a lead-free ink designed for printing on untreated polypropylene. Its unique formulation makes pretreatment or surface coating unnecessary. For use on containers, mugs, cups, pharmaceuticals, cosmetics, specialty ad products, and more.

**System 2 Series** Solvent-based Vinyl Screen Ink is a high gloss, solvent-based screen ink formulated for optimum performance on pressure sensitive vinyls and top coated polyesters used for decal applications.

**VF Series** Solvent-based Vinyl Screen Ink is formulated for excellent adhesion to both rigid and flexible vinyls and some vinyl-coated materials. VF Series exhibits excellent printability, opacity, fast drying and non-blocking characteristics.

*Nazdar 2300, 5100, 8400, 9700, ADE, PA, System 2, and VF Series have passed CPSIA testing.*
